

Amendments to the Specification:

Please replace the paragraph beginning at Page 10 line 8 with the following:

FIGURE 2 is a block diagram that schematically illustrates one example of a deployment view of mobile terminal platform system 12 of FIGURE 1 to further assist in understanding principles of the present invention. As illustrated in FIGURE 2, mobile terminal platform assembly 12 is controlled via software executing in a main CPU 50. The main CPU 50 may include one or more processors such as microprocessors, micro programmable processors or DSPs (Digital Signal Processors) 52. The software stacks 30-38 of software services component 22 each include hardware driver software 60-68 to operate the hardware units associated with each stack. Further details of the mobile terminal platform assembly 12 and platform system 10 are given in the above-mentioned commonly-assigned U.S. Patent Application Serial No. 10/359,835.
